

An inspiring physical, emotional, and spiritual guide for prostate cancer patients, survivors, and their loved ones.

Conquer Prostate Cancer empowers boomer and senior men to face diagnosis with dignity, explore their options realistically, and tackle recovery with optimism. It is also an insightful resource for their wives or partners, family, friends, doctors and other healthcare providers. As the author and his wife share the most intimate details of their prostate cancer journey, readers learn how to:

- Become an active member of their medical team
- Reduce pain and stress and renew vitality
- Overcome impotence and incontinence
- Enhance intimate relationships
- Draw strength from faith, family, and friends

The first book to emphasize robotic surgery for prostate cancer from the perspective of an informed prostate cancer survivor and healthcare educator, *Conquer Prostate Cancer* discusses the latest research and advances in treatment, and profiles twenty patients who chose various treatment options.

Prominent robotic surgeon Dr. Robert Carey discusses medical and patient-care concerns and the author's wife provides a running commentary, sharing her thoughts about how she and her family coped with the disease and its effects.

With its low-key humor, positive and hopeful tone, and well-researched facts, this book is a powerful tool for surviving prostate cancer.

The author, RABBI ED WEINBERG, is a prostate cancer survivor and rabbi with a doctorate in gerontology from Columbia University. Contributing author DR. ROBERT CAREY is a prominent urologist and robotic surgeon with a Ph.D. from MIT. DR. DAVID KAUDER, the book's medical advisor, has been a urologist for the past 30 years and is a past president of the Massachusetts Association of Practicing Urologists.
